

## Please join the City of Superior at our first annual Erosion Control and Stormwater Management Trainings

**Starting in 2016, Superior will be implementing a revamped Stormwater Management Program.**

**Consultants:** Learn about program changes related to design and permitting erosion control and stormwater management plans. These updates as well as information related to designing clear and cost effective erosion control plans will be presented at the Consultant Training.

**Contractors:** Learn about updated implementation and inspection requirements. Erosion control installers and inspectors will be required to have completed a related training which the Contractor Training will fulfill. This year we will be focusing on silt fence, construction entrances, and inlet protection. The contractor training will include a field component in which attendees will participate the installation, maintenance, and removal of specific BMPs.

**Get details on program updates & learn about City expectations!**

### WHERE:
